

FIRENZE

il ferro forgiato che avvolge
the forged iron that wraps

Una maglia metallica modulare che avvolge le superfici o le crea: realizzata attraverso il processo di forgiatura a caldo, costituisce una griglia che, già di per sé, costituisce un ornamento di gran pregio. Tale struttura può essere ulteriormente impreziosita e personalizzata applicando elementi decorativi di forme e materiali differenti. Una soluzione innovativa per facciate ornamentali di design.

A modular metallic grid that wraps or creates the surfaces. Realized by a hot forged process it is a grid that for its intrinsic characteristics, also on its own, becomes an high quality ornament. The structure can be embellished further more and personalised by the application of decorative elements of different shapes and materials. An innovative solution for ornamental façades of design.

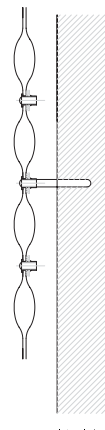

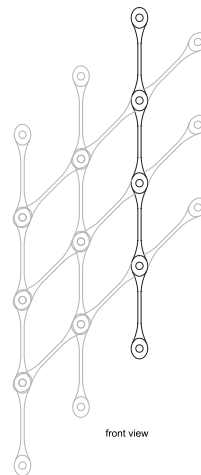

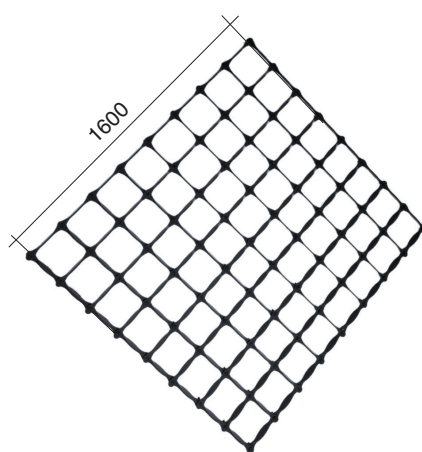

MATERIALI DISPONIBILI *Available Materials*

FINITURE SPECIALI MATERICHE *Texture finishings*

MOD. VULCANO
